

## Assessment Survey EGR120 – Summer 2013

### Engineering Design Process Case Study

The following survey is intended to evaluate the Dental Composites Design Process Case Study we did in class this semester, and to find ways to improve it as a way of learning. Your honest, thoughtful response would be appreciated. Your opinion will not be used against you or your grade. Maximum points can be earned by answering the survey completely.

- How effective was the dental composites case study project in meeting course objective in understanding the engineering design process?

Not useful                      1   2   3   4   5                      Very Useful

Please explain the reason for your response above

- How well do you think the dental composites case study contributed to your understanding of the design process compared with other course activities and assignments?

Did not contribute at all            1   2   3   4   5            Contributed a great deal

- Which part of the case study did you find the most helpful in understanding the design process?
  - a. Class lecture about the project
  - b. In class group activity
  - c. Research assignment and report
  - d. Research presentation
- Which part of the case study did you find the most engaging?
  - a. Class lecture about the project
  - b. In class group activity
  - c. Research assignment and report
  - d. Research presentation
- If the case study is repeated in future semesters, what recommendations do you have for ways to improve it?

Thank you for your response!
